About Me

Computer Science undergraduate at IIT (University of Westminster affiliate) passionate about creating meaningful user experiences. Skilled in user research, wireframing, prototyping, and designing clean, intuitive interfaces. Actively seeking a UI/UX internship to apply design thinking and solve real-world user problems.

Education

BSc Computer Science

University of Westminster
2024-Present

GCE Advanced Level

Ferguson High School/ Rathnapura
2020-2022

Achieved C,S,S in Biology, Chemistry and Physics

SKILLS

- Project Management
- Team Collaboration
- Creativity
- Adaptability
- Communication Skills

Technical Skills

Programming Languages

Python

Java

JavaScript

PHP

Web Development

HTML

CSS

React.js

Node.js

Express.js

Database:

MySQL

MongoDB

UI Design:

Figma

Version Controlling:

Git/ Github

Language

- English
- Sinhala

Followed Courses

- Learning Spring with Spring Boot (LinkedIn Learning-2024)
- Java Object-Oriented Programming (LinkedIn Learning-2024)
- React Essential Training (LinkedIn Learning-2024)
- Web Development (Open Learning platform-UOM– 2024)
- Foundations of Project Management (Open Learning Platform-UOM -2024)
- Programming Foundations (LinkedIn Learning-2024
- UI-UX Design & AI Technologies (FSD Academy - 2025)

UNIVERSITY PROJECTS

TankTrack - Smart Septic Tank Overflow Detector (SDGP)

Link

Developed a Smart Septic Tank Overflow Detector mobile app to enhance wastewater management and prevent overflows. Key features: real-time monitoring, predictive alerts, maintenance scheduling, weather integration, automated reports, and voice notifications. Improved sanitation, reduced environmental risks, and streamlined septic tank maintenance
for residents and facility managers.

Technologies : Flutter, Firebase, ESP8266, JSN-SR04T Ultrasonic Sensor, MQTT Springboot and MongoDB

Refined Residences- Luxury Property Search Web Application

Website

Designed and Developed a React and Vite-powered luxury property search platform with an intuitive, modern UI. Key features: advanced search filters, responsive design, interactive property gallery, drag-and-drop favorites system, Google Maps integration, and detailed property pages. Ensured secure routing, optimized performance, and seamless user experience across all devices.

Technologies : React.js (Vite) and JSON , Figma

Life Below Water Website UNSDG

Collaborated in a group project to develop a fully functional website using HTML, CSS, and JavaScript. The project focused on preventing marine pollution, promoting sustainable fishing, and protecting ecosystems in alignment with United Nations SDG 14

Technologies:HTML, CSS, JavaScript

BookStore API

Developed a RESTful API for managing customers, carts, and orders, including handling errors like missing fields, invalid data, and existing resources. The API was tested thoroughly using Postman to ensure proper functionality and robust error handling.

Technologies: Java, Rest API

Fluent Me - Spoken English Practice App

Designed a mobile app to help users improve spoken English through daily voice tasks, real-life conversation prompts, and gentle feedback. Conducted user research and created the app logo, user personas, journey map, user flow, and interactive prototype using Figma. (Personal Project)

Technologies: Figma, Sketch, Adobe
